

PCIP - POST CONTRACT IMPLEMENTATION PERFORMANCE

BUSINESS OBJECTIVES

The objective of the Post Contract Implementation Performance is to understand the manufacturing process after the contract is signed and the project is going through design to delivery.

SOLUTION

The solution was required to build a powerful visualization for executives to view the on-time delivery metrics for active projects on keys milestones like:

- Design Freeze
- Order Entry
- Received on Site from Manufacturing
- Received on-site – Resale
- Installation Complete
- Beneficial Use

SUCCESS CRITERIA & BUSINESS VALUE

The report and the data integration layer were heavily used at the level of CEO, PMO and Executive Committee to answer questions.

- How the gates are working through the design to order entry to manufacturing etc.?
- How much percentage of the project is behind schedule per each week?
- Why the schedule is late for order entry?
- How we have delivered the project?
- How on-time we were in delivery?
